Contract awarded for Haughton River Floodplain Upgrade

One of north Queensland’s most significant Bruce Highway upgrades is a step closer with a design and construction contract awarded on Wednesday for the Haughton River floodplain upgrade.

The upgrades will be designed and built by The Infrastructure Group joint venture between Bielby, BMD Constructions, JF Hull and Albem Pty Ltd with ARUP Group and HDR Inc.

Construction of the project will start in mid-2018 and be completed by around mid-2021, weather permitting.

Deputy Prime Minister and Minister for Infrastructure and Transport Michael McCormack said the project would improve safety and flood resilience by upgrading 13.5 kilometres of highway, including realigning the Reed Beds curve and building a new Haughton River Bridge and several other wider, higher bridges.

“The project also includes upgrading nine rural intersections, building two cane-rail overpasses and installing wide centrelines on the highway north of Ayr,” Mr McCormack said.

Queensland Minister for Transport and Main Roads Mark Bailey said the new Haughton River Bridge would be more than 10 metres wide and built to withstand a one-in-100-year flood, such as that caused in parts of Far North Queensland by Ex-Tropical Cyclone Nora.

The Australian government has committed up to $411.4 million to the project with the Queensland government contributing $102.9 million.

The Haughton River Floodplain Upgrade Project information can be found here.

2018 Farm Maps now available

Wilmar have entered the 2018 farm map information and estimates on the Grower Web last week.

Growers are encouraged to log on and check that the information recorded is correct and if not to advise the relevant Wilmar mill area logistics officer.
Vegetation laws anger sugarcane growers

CANEGROWERS members will join farmers from other industries voicing their anger at State Government moves to change Queensland’s vegetation management laws as a Committee reviewing the amendments travels to regional areas this week.

“The Queensland Government is risking the sugarcane industry’s contribution to the state’s economic growth with these amendments,” CANEGROWERS Chairman Paul Schembri warned.

“On the one hand it is telling cane growers that the future holds some exciting opportunities for our crop to contribute to green energy and biofutures industries and help feed a growing world population.

“But on the other hand, it is knnobbling our ability to get the most production we can from the land we own and farm to take advantage of these opportunities.”

In its submission to a review of the proposed amendments to the Vegetation Management Act, CANEGROWERS also pointed out that sugar mills were offering incentives to growers to put in more cane to keep their operations viable.

“Abolishing the provisions that allow clearing for High-Value Agriculture (HVA) and Irrigated High-Value Agriculture (IHVA) and deeming any regrowth over 15 years as High Value cut through the rights of farmers to make decisions to farm their land in the way they best see fit,” Mr Schembri said.

“We need a sensible balance between the environmental sustainability and agricultural production – these amendments fail to do that.”

CANEGROWERS members are registering to appear before the Townsville and Cairns hearings of the State Development, Natural Resources and Agricultural Industry Development Committee.

Are you paying too much for your health insurance?

As a member of CANEGROWERS Burdekin special rates are available to you through Queensland Country Health Fund.

Did you know Queensland Country Health Fund:

⇒ offers members of CANEGROWERS Burdekin a special CORPORATE discount off the policy of their choice - a saving of 6% on the policy of your choice
⇒ has a branch in Ayr and Home Hill where you can talk directly to a real person
⇒ has opened their magnificent Head Office across the road from Myer in Townsville and is the only health fund with its head office in North Queensland
⇒ has a major dental practice under their head office and that members of the health fund have access to free general dental whilst members of the credit union have access to discounted dental services
⇒ owns accommodation units in Brisbane and Townsville and that these units are available for health fund members use when they need to travel for medical needs
⇒ has been independently awarded the CANSTAR 5 star rating for outstanding value on hospital cover for Queensland
⇒ is a “not for profit” which means that the profits are directed back to provide better services for members.

Community visitors for the elderly

Burdekin Community Association has a wonderful FREE Service for the elderly people who are lonely and would enjoy the company of a visitor.

The service is called “Community Visitors Program” which aims to decrease loneliness and increase interactive comradeships between volunteer visitors and our elderly.

If you are interested in this service or know of anyone whose quality of life could be improved by the companionship of a regular visitor, kindly contact Rita at BCA on 47833744.
Harvesting efficiency: dollars in your pocket, not in the paddock

Sugarcane growers, millers and harvester operators will hear how they can harvest the maximum amount of sugar and cane from the paddock at a series of upcoming regional forums across the Australian industry.

Harvesting efficiency and optimisation is a major focus area of Sugar Research Australia’s investment on behalf of the Australian sugarcane industry, and will be the topic of the regional forums being held in 12 locations over the coming weeks leading up to the 2018 harvest.

SRA Adoption Officer for Harvesting, Mr Phil Patane, said improving harvesting efficiency is a complex problem that involves multiple stakeholders and considerations, but is also a major opportunity for the Australian industry to extract more from value chain.

“SRA has trial results building to show cane and sugar loss as a result of a range of economic drivers across the harvesting, transport, and milling value chain,” Mr Patane said.

“In some cases, practice change may come with additional costs, but SRA is working with growers, millers, and harvesting groups across the industry to provide them with precise information to help inform their decisions.

“In order to make practice change, the industry needs detailed information on what losses are occurring and what they stand to gain if they change practice to further optimise the harvest.

“This has been the focus of on-farm demonstration trials in 2017, where we have worked with local harvesting groups, in their own conditions, to define what sugar and cane loss they may be incurring.

“The 2018 forums will report extensively on the results of these demonstration trials. The forums will also be an opportunity for harvesting groups to take part in a new round of demonstration trials for the coming harvest. This will allow them to assess harvesting efficiency in their own local region, and local conditions.

“The forums will also present information from a range of innovative research activities.

“We will hear about research that is looking at the design and function of harvesters to see if improvements can be made to ensure we are harvesting more sugar. We will also hear about a new online tool, called SCHLOT, which provides advice for harvester operators to optimise the harvest.”

SRA’s work in harvesting efficiency is being driven by a project called Enhancing the sugar industry value chain by addressing mechanical harvest losses through research, technology and adoption, which is funded by SRA and the Department of Agriculture and Water Resources as part of the Rural R&D for Profit program.

To view all SRA events visit [www.sugarresearch.com.au](http://www.sugarresearch.com.au)
Executive Comment

Meeting with the Australian Sugar Milling Council (ASMC) to discuss the review of the Australian Sugar Alliance (ASA) trade strategy.

Catch-up with the CEO of Terrain NRM to discuss progress with the Wet Tropics Sugar Industry Partnership.

Teleconference to discuss a new contract to restart the ASA Social License to Operate – nutrition project.

Teleconference with industry colleagues to discuss the probable process for the review of the Federal Code of Conduct and our possible response.

Various meetings with QFF and other members regarding proposed vegetation management legislation changes.

Meeting with Ministers Furner and Lynham regarding Vegetation Management Bill.

Meeting with LNP members and opposition Ag / Water spokesman to discuss Vegetation Management Bill.

Catch-up with Behaviour Innovation to discuss progress with Cane Changer project which has been working in the Tablelands and Mossman districts recently.

Qld Farmer Federation meeting. The QFF meeting discussed a range of issues, of note were:

- Vegetation Management Bill
- Solar farm planning guidelines – consultation underway across the state
- Water and energy issues – with pricing being the most topical issue
- Digital ag, with a presentation from Telstra business services to discuss their regional investment plans and customer service obligation

Gave evidence to the Parliamentary Committee hearing into the Vegetation Management Bill.

Discussion with Lindsay Jolly who is back working in country having spent many years with the International Sugar Organisation. Lindsay has previously presented to the CANEGROWERS Policy Council.

Meeting with the National Farmers Federation and reps from ASMC to discuss the impending hearing by the Fair Work Commission as it deliberates on the review of the Sugar Award.

Meetings hosted by Qld Department of Agriculture – Disaster Coordination Committee to assess and discuss assistance measures following the flooding events in Northern QLD. District offices have been supported by the Department to gather impact data to assist in determining assistance measures required.

CANEGROWERS insurance workshop with Community Broker Network (CBN).

Meeting with ASMC regarding a renewal for the Social License to Operate – Nutrition Pillar contract development for further work to be funded and completed between April and June 30.

Vegetation Management

CANEGROWERS submission for the Vegetation and Other Legislation Amendment Bill 2018 was sent to the State Development, Natural Resources and Agricultural Industry Development Committee. To recap – QCGO’s policy position on vegetation management:

- Retain provisions to allow for the use of High Value Agriculture (HVA) and High Value Irrigated Agricultural (HVIA) land – the Bill seeks to remove the use of HVA/HVIA land.
- Maintain accepted development vegetation clearing codes – the future of self-assessable codes is unknown.

Create policy in consultation with key industry stakeholders – this legislation is a Labor Government election commitment and CANEGROWERS will be seeking consultation with both Government and affected industry groups.

The effects of the proposed amendments:

- extend the protection of high value regrowth vegetation to align with High Conservation Values by:
  - Increasing the land types on which high value regrowth is regulated (as category C) to include freehold land, indigenous land and occupational licences; and
  - amend the definition of high value regrowth to be vegetation that has not been cleared for 15 years;
  - remove high value agriculture and irrigated high value agriculture as a relevant purpose under the Vegetation Management Act 1999. This will remove the ability to apply for a development approval for clearing for high value and irrigated high value agriculture, and removing supporting provisions such as relevant purpose decision making criteria;
  - provide consistent protection to regrowth vegetation near watercourses in all Great Barrier Reef catchments, by extending category R to include regrowth vegetation in watercourse and drainage feature areas in three additional Great Barrier Reef catchments—Eastern Cape York, Fitzroy and Burnett-Mary catchments;
  - reintroduce provisions in the Water Act 2000 to require landholders to obtain riverine protection permits for clearing vegetation in a watercourse;
  - provide enhanced compliance measures that will assist with enforcement of vegetation management laws consistent with other similar contemporary natural resource legislation;
  - provide an option to landholders to request an area mapped as a category X area to be converted to a category A area, where the area contains remnant vegetation or high value regrowth vegetation on the ground; and
  - support the implementation of the revised accepted development vegetation clearing codes (accepted development codes) including changes to area management plans.

Plant Health Australia

Attended the PHA Annual Operating Plan webinar. The PHA webinar can be accessed via the following link http://www.planthealthaustralia.com.au/about-us/events/member-meetings/
Trade
✓ Discussion between CANEGROWERS and ASMC on pathway forward for managing the industries trade activities.
✓ Further discussions with DFAT in relation to Pakistan sugar export subsidies and the threat of export subsidies from India.
✓ Discussions with NFF in preparation for its April Trade Committee meeting.
✓ Engaged the Brazil and Thai industries in relation the Pakistan and India export subsidy issue.

Water and Electricity
✓ Attended the QFF Water and Energy Policy Committee meeting. A focal point of discussion related to the forthcoming reference from government to QCA to review water prices.
✓ Participated in the AER Customer Reference Group examining the RoR guideline.
✓ The AER Consumer Reference Group (CRG) is continuing its work developing a submission on the AER’s rate of return guidelines. Sapere Research Group has been engaged by the AER to assist the CRG.
✓ CANEGROWERS provided advice to the ACCC, on flaws in the electricity pricing framework that are adversely affecting affordability and encouraged the ACCC to assess the resulting excess profits of network businesses.
⇒ We shared with the ACCC a copy of the report prepared by Hugh Grant for CANEGROWERS that outlines how the Queensland government profits from the State’s excessive electricity prices.
✓ The Queensland Industry Energy Alliance (CANEGROWERS, QFF and CCIQ) welcomed a new member the Refrigerated Warehouse and Transport Association of Australia (RWTA) to the alliance.
⇒ Post-election environment messages to government are being sharpened, reflecting previous work and the validation of that work in the Finkel report and separately by the ACCC.

Marketing
✓ Further discussions with ACFA and prospective consultants in preparation for the Sugar Code review.
✓ CANEGROWERS is collaborating with ACFA in the preparation of a letter to Minister Littleproud requesting the review commence as soon as possible.
✓ Progress on developing CANEGROWERS Marketing Information Service.

Natural Disaster Relief and Recovery Arrangements (NDRRA)
✓ CANEGROWERS met with the Queensland Department of Agriculture and Fisheries to discuss the requirements for NDRRA Category B and C declarations for the flooding events in North Queensland.
✓ Affected districts are still in the process of determining the full extent of damage.

Transport
✓ CANEGROWERS, AgForce, Cotton Australia and National Farmers Federation met with the Queensland Department of Transport and Main Roads (TMR) to discuss the TMR initial response to the NFF proposed Class 1 Agricultural Vehicles National Notice. TMR are in the process of drawing up a response and did not discuss the detail but have not rejected the NFF proposal at this stage.
✓ Numerous transport issues for individual members have been dealt with subsequent to the series of workshops from Mackay to Mossman.

Lower Burdekin Groundwater Strategy Project
✓ CANEGROWERS was briefed by the Department of Natural Resources, Mines and Energy on the Lower Burdekin Groundwater Strategy project which is investigating ways to halt and reduce the rising ground water in this area.
✓ Significant work has been done and options determined.
✓ This was an initial consultation on possible options and a draft Lower Burdekin Groundwater Strategy will be developed for further comment and consultation.

Rural Jobs and Skills Alliance (RJSA)
✓ A workshop was attended to determine a three-year strategic plan for the RJSA. This will be used to apply for funding which were made available as an election issue.

Chemicals
✓ Attended the Chemical Working Group meeting in Townsville on Thursday.
✓ Workshop discussed water quality guidelines, some of the grower lead monitoring projects such as the Sandy Creek monitoring project as well as research into application equipment (Stoolzippa) and monitoring for imidacloprid.
✓ Imidacloprid, metalaclor and diuron is being found in water quality monitoring across the GBR catchments. As an industry we need to be conscious of this and continue to support good practices, application and record keeping for the use of these chemicals.

Smartcane BMP
✓ Unilever, a major multinational manufacturer of food and beverages, has reviewed the Smartcane BMP program and assessed it to be fully compliant with their sustainable agriculture principles and practices.
✓ Attended a briefing on progress with the Pentland bioenergy project by Renewable Developments Australia. This will involve the development of a fully integrated sugarcane farming, processing and ethanol distillation facility. There will be some use of super sweet sorghum varieties. Preliminary field trails have been completed. The project should commence later this year. Accreditation in Smartcane BMP is important to this group, so it has the option of supplying the domestic biofuels market.
1. QFF industry member CANEGROWERS has joined farmers from other industries in voicing their anger at the State Government’s move to change Queensland’s vegetation management laws. CANEGROWERS statement HERE.

2. QFF industry member Growcom insists the Queensland Government reinstate the permit system for clearing of high value agricultural land (HVA) in the interests of consumers and growers. Growcom's statement HERE.

3. QFF’s Georgina Davis spoke to ABC’s Country Hour on behalf of farmers seeking guarantee that future solar development will not come at the expense of prime agricultural land. Listen HERE.

4. Queensland’s agriculture industries are urging the State Government to support on-farm water efficiencies and continue its highly successful Rural Water Use Efficiency (RWUE) program. QFF statement HERE.

5. The Department of Agriculture and Water Resources have launched a series of animated videos entitled ‘Don’t be a Jeff’, which aim to engage the public on biosecurity, why it matters and what their role is in the system. Videos HERE.

6. Queensland agriculture is united in opposition to unbalanced Vegetation Management laws introduced by the State Government. See why QFF and its industry members are frustrated HERE.

7. Queensland farmers and their communities are one step closer to getting a balanced approach to the large scale solar expansion thanks to the 18-month campaign by QFF and its industry members. Details HERE.

8. QFF industry member CANEGROWERS has estimated just over half of all sugarcane area between Townsville and Cairns has been inundated in the recent North Queensland flooding events. Statement HERE.

9. Telstra has reaffirmed its commitment to providing more regional Australians with improved connectivity, announcing $17 million of its own funding will be spent on developing the mobile network in the Darling Downs and Western Queenslan.

10. Skyrocketing energy costs and a lack of security of supply will be the first battle front for the newly-formed Australian Agricultural Manufacturers’ Alliance (AAMA). Details HERE.

QFF is a federation that represents the interests of peak and national agriculture industry organisations which in turn represent more than 13,000 primary producers across the state.

CANEGROWERS is a major commodity member of QFF.

</tr>
</tbody>
</table>

Wilmar has contributed economic interest sugar from its farms to this pool, to provide added tonnage to the pool and also to align the interests of growers and Wilmar to maximise the pool price outcome. Wilmar economic interest sugar in this pool will receive the same price as growers. The pool is priced on a 1:2:2:1 basis as of the 29 December Wilmar has sufficient tonnage delivered to the Bulk Sugar Terminals to cover all previously priced and physically sold tonnage and has now begun pricing the Production Risk Pool.

Gross Pool Prices are an estimate based on the tonnes hedged and current market price (as at the last business day of the month) for unhedged tonnage. Allocation Account Amounts begin the season as estimates and are reviewed and updated on a monthly basis as actual premiums and costs are known.

The monthly pool price report is available on the Wilmar grower web

Growers can monitor QSL pool performance via the Price Pool Matrices published on the QSL website ([www.qsl.com.au](http://www.qsl.com.au)). This information is updated regularly and provides a sense of how the QSL-managed pools are performing over the current season.
WORLD FISH MIGRATION DAY

21 APRIL (8:30am-12pm)
(tree planting starts 8:30am)
Opposite Kalamia State School, Lilliesmere Rd

NO Dry Tropics invites you to a free event to celebrate World Fish Migration Day

- Come and learn about our native fish, how they migrate, and the importance of local waterways and wetlands.
- Find out why healthy fish stocks rely on waterways without barriers.
- Tree planting, presentations, free BBQ, kids games, barramundi release, and prizes.

This event is supported by funding through the Australian Government’s National Landscape
Program.

Contact Eliza Lovell or Lucy Poppi for more information
