Senator Cormann visits the Burdekin

Federal Minister for Finance Senator Hon. Mathias Cormann accompanied by Dawson MP George Christensen visited the Burdekin this week. Senator Cormann is leader of the government in the senate and is also a member of the Morrison government cabinet.

Senator Cormann met with grower organisations and was keen to hear about any industry issues, suggestions or solutions that growers are currently faced with.

Whilst in the Burdekin he also met with Burdekin Shire Council representatives and Wilmar Sugar managers.

CANEGROWERS Burdekin members are invited to a Sugar Marketing & Pricing Information Workshop

Members are invited to attend a workshop that focuses on building the knowledge of how cane prices are set by the global sugar price, and how various in-season and forward pricing options can respond to different sugar market situations.

Workshops sessions of approx. 2 hours duration will be conducted at CANEGROWERS Burdekin,141 Young Street on the following times:

⇒ Monday 2nd September – 2pm to 4pm and 4.30pm to 6.30pm
⇒ Tuesday 3rd September – 11am to 1pm and 5.30pm to 7.30pm

As places are limited for the workshops, reservations will be accepted on a first come first placed basis. To reserve a place at the workshop please phone Michelle or Tiffany on 4790 3600.

Wilmar Q2 net profit halved due to lower crush margins & swine fever

Singapore press reports said last week that Wilmar International's net profit for the second quarter fell 52 per cent to US$151 million from a restated US$316.4 million a year ago on the back of lower soybean crush margins, weaker showing by associates and sugar business as well as higher finance costs.

Wilmar stated that the African swine fever outbreak's impact on soybean meal demand was greater than previously expected. The profit decline was partially offset by strong performances from consumer products and oleochemicals.

Revenue was 9 per cent lower at US$9.8 billion from US$10.8 billion a year ago due to lower commodity prices which were partially offset by a nearly 4 per cent jump in sales volume.

Core net profit halved to US$177 million for the three months to June from US$352 million. The main culprit was the greater-than-expected impact of the African swine fever on soybean meal demand which led to lower crush margins, said the company in its results announcement on Tuesday. This negative was however partially offset by strong performance from consumer products and oleochemicals.

Although the sugar operations in Australia and Indonesia performed better this year, Wilmar said the segment was impacted by the consolidation of Shree Renuka Sugars Limited which became a subsidiary in June 2018 and the accounting losses of its discontinued operations in Brazil. In addition, the results were also affected by lower contributions from China associates.

Over the period, finance costs rose 27 per cent to US$247 million as a result of higher borrowing rates following hikes in interest rate and higher average bank borrowings, said Wilmar.

Accordingly, earnings per share fell to 2.4 US cents versus five US cents a year ago.

The group has declared an interim dividend of three Singapore cents per share, lower than 3.5 Singapore cents per share recommended in the previous year's corresponding quarter.

For the first-half period, net profit declined 22 per cent to US$408 million on the back of a nearly 8 per cent dip in revenue to US$20 billion. Core net profit dropped 20 per cent to US$427 million over the half-year period.

Click here for Wilmar's medial release, the divisional and financial reports for the second quarter and first half can be viewed by clicking here.
**Reef Bill #RejecttheRegs**

The Reef Bill has not been brought on for debate in the Queensland Parliament this week and we now expect this to happen in September, although the ultimate timing is a matter for the State Government.

In the meantime your CANEGROWERS representatives will continue to seek meetings with government to raise the industry's concerns, as we have every step of the way through submissions and public statements. Read a summary of the CANEGROWERS position here.

There are a number of ways you can help.

- Have you signed the #RejecttheRegs online petition? Hosted on a National Farmers’ Federation platform this is one way every grower, their family and business associates can send a clear message to the Queensland Government. The final numbers will be presented during the debate.

- Have you seen the CANEGROWERS TV commercial about the Reef Bill? There's a longer Stop the Reef Bill video on YouTube which we encourage you to watch and share ahead of the parliamentary debate.

CANEGROWERS has aimed to elevate the voice of growers. We believe the best way to secure a sustainable future is through supporting growers on their exiting pathways and programs such as Smartcane BMP - not through more rules, red tape and regulation.

---

**Legume lessons learnt**

A series of workshops funded by the Enhanced Extension Project were held in the north this week to give canegrowers and industry first-hand knowledge about the benefits of inoculating legumes.

DAF Burdekin Extension Officer Brock Dembowski said it was a topic that had been suggested by growers.

``There has been a lot of talk about how to successfully inoculate legumes, and the workshops have been a good way to bust some of the myths and misconceptions on how that can be achieved’’ he said.

Principal soil microbiologist Dr Nikki Seymour travelled from Toowoomba to present the workshops in Mackay, Ingham and the Burdekin.

Dr Seymour spoke about how nitrogen fixation works and the potential gains for farming systems, as well as best practices for inoculation and handling and storing inoculum.

Attendees also learnt about the differences in nitrogen contribution to the soil from a harvested crop, versus green manure. Mr Dembowski said the feedback from the participants has been very positive.

More than 100 growers and industry representatives attended the three workshops.

Clare farmer Kevin Fiamingo said he gave up the rare opportunity to go out fishing to attend the grower session. “This is something I have been wanting to learn more about for a while,” Mr Fiamingo said.

The grower-led suggestion for the workshop was conceived during meetings held for peer to peer grower groups. The Burdekin Field Walk Group, which received funding from the Enhanced Extension Project, allowed growers to visit Toowoomba in June. The visit was led by Mr Dembowski and nine growers from the Burdekin region.

Another topic that has peaked growers interest following their visit to Toowoomba was grain storage. Workshops funded by the Enhanced Extension program will be held next month by DAF grain storage specialist Phillip Burill.
Haughton River Floodplain Upgrade project update

Construction of the Haughton River Floodplain Upgrade (HRF) project is progressing on schedule, with a variety of works already completed.

Activities during August and September will include:

- earthworks / embankment construction from Horseshoe Lagoon to the Haughton River, and from Link Road to the end of the project (Mailman Road)
- start construction of the Haughton River Bridge
- Ergon works for relocation of the 66kv power lines in the southern and northern sections and 11kv in the northern section of the project

Click here to view the August construction update.

Marketing Information Service for members

The CANEGROWERS Marketing Information Service is now online and available to all CANEGROWERS members.

The Marketing Information Service provides education and information. It is an independent service which will not favour one sugar marketer over another.

The Marketing Information Service is under the Resources tab on the CANEGROWERS website. It can also be reached via this direct link.

This is a service for CANEGROWERS members although the introductory page is available for anyone to see. Members will need your membership number and district name to log in and access the material.

You can find your membership number on the cover sheet of the CANEGROWER magazine that is mailed out to members or contact the office for your membership number.

Harvesting Contractor/Grower Survey

SRA are conducting a short survey (5 minutes) on the Harvesting Predictive Model, currently under development in collaboration with Queensland Department of Agriculture and Fisheries, and your input would be appreciated. Click here to start the survey (responses close on 5 September).
SRA farewells Executive Manager, Strategic Initiatives, Dr Frikkie Botha
Sugar Research Australia (SRA) has announced that Dr Frikkie Botha is leaving their organisation.

Dr Botha has been with SRA since 2009 and has held numerous positions during that time, including Variety Improvement Program Manager, Executive Manager for Technology, and Executive Manager for Strategic Initiatives. Prior to these positions, Dr Botha was the Executive Director of the Sugar Research and Development Corporation, a role that he moved to Australia to begin in January 2008.

Dr Botha also has a distinguished international career, including roles as CEO of the South African Sugar Association, Honorary Professor of Biotechnology and Genetics at the University of Stellenbosch, Professor of Plant Biotechnology at the University of Natal, along with many other positions. He is also an Honorary Professor of Biotechnology and Genetics at the University of Queensland.

SRA CEO Mr Neil Fisher said that Dr Botha has played a crucial role in major research programs including variety development, GM cane, and solving and understanding yellow canopy syndrome.

“These research programs have come with complex scientific and industry challenges, as well their share of setbacks, but Dr Botha approached the job with enthusiasm and diligence,” Mr Fisher said.

“He is particularly proud of the herbicide-tolerant cane project team’s work, which met every scientific milestone set by our joint partners DuPont, and yet we were not able to take this technology to industry due to factors outside of our control.

“He has provided a key leadership and mentoring role at SRA and has established a strong rapport with industry through his communication skills and pragmatic understanding of the needs of our investors.

“Dr Botha has made a tremendous contribution to the Australian (and international) sugarcane industry and made a deep and meaningful impact.”

His last day with SRA will be Friday 8 November.
Executive Comment
✓ Ongoing management of Reef Bill campaign.
✓ Trade
✓ The Australia-EU FTA negotiations moved one step forward this week when the Australian government launched public consultations on the list of terms the EU wants to protect as Geographical Indications. The commencement of this process removes a hurdle which has so far prevented the EU from tabling its market access offer for agricultural products including sugar.
✓ CANEGROWERS continues to make the case for the full inclusion sugar in the Australia-EU FTA.

Reef Advisory Committee (RAC)
✓ CANEGROWERS attended a meeting of the RAC on 6-7 August. The RAC provides strategic advice on the implementation of Reef 2050 actions, stakeholder priorities, and highlights any emerging issues that need to be addressed. The Chairman is the Honourable Penelope Wensley AC, former Governor of Queensland. Discussions covered the AIMS annual summary report on coral reef condition, the Reef Water Quality Report Card, and the Reef Outlook Report. There was little detail on the latter 2 reports - they are ready for release, but the timing is in the hands of the Australian and Queensland Governments. The report card will cover 36 smaller catchments, rather than the 5 broad catchment regions of previous reports. The process for review of the Reef 2050 Plan was also discussed.
✓ The trend in coral covers show that the recovery periods between major disturbances (from climatic events and/or bleaching) is declining, such that overall reef cover only makes a partial recovery before another decline occurs. This emphasises the impact of climate change, including more frequent periods of high-temperature water, more frequent extreme weather events, and a decline in the pH of sea water.
✓ CANEGROWERS explained that its opposition to the new reef Bill was due to its design faults, particularly in relation to lack of benefits for water quality, its lack of government accountability, and the risk of disengagement amongst growers. QFF backed up these arguments.

Reef Bill
✓ A meeting this week between the Office of the GBR and industry bodies to discuss reef regulations has been postponed. We were informed that the Bill will not be debated by Parliament during this week’s sitting (week beginning 18 August).

APVMA seeking input on critical use of certain chemicals
✓ The APVMA is looking at the critical uses of a number of active ingredients that they currently have under review, before they make a proposed decision on the use patterns for these products.
✓ The list includes a number of chemicals that are used by cane growers: apvma.gov.au/node/52051
✓ A critical use is one where no alternative products exist. CANEGROWERS will provide a submission on behalf of industry, informed by information from SRA.

Innovation - Sustainable Sugar
✓ CANEGROWERS met with American Sugar Refiners (ASR) to discuss their current requirements for sustainably sourced sugar.
✓ As ASR receive Queensland origin sugar, they need to demonstrate to their customers how it meets their quality and sustainability criteria.
✓ ASR are working with Proterra and the Proterra sustainability standard to do this.
✓ ASR are conducting mill and three grower audits in Tully to support their sustainability needs.
✓ CANEGROWERS has worked with ASR and Proterra for the past three years through Smartcane BMP to provide a pathway for sustainably sourced sugar.
✓ CANEGROWERS met with Nestle’s Global Responsible Sourcing Leader from Switzerland and their Head of Corporate and External Relations in Brisbane. The meeting was a result of CANEGROWERS continuing engagement on sustainably sourced sugar and the relationships and network it has built with end users and manufacturers over the past 5 years.
✓ The meeting was productive, with Nestle outlining its responsible sourcing needs and CANEGROWERS showing how Smartcane BMP can meet these needs.
✓ CANEGROWERS also set up visits for Nestle with sugarcane growers in Innisfail, Tully and Herbert River. This offered Nestle the chance to see firsthand how sugarcane is produced, the practices used and where Smartcane BMP can support their responsible sourcing needs.
CANEGROWERS Queensland ... taking up the fight on all issues affecting cane farmers

Trade
✓ The Australia-EU FTA negotiations moved one step forward this week when the Australian government launched public consultations on the list of terms the EU wants to protect as Geographical Indications. The commencement of this process removes a hurdle which has so far prevented the EU from tabling its market access offer for agricultural products including sugar.
✓ CANEGROWERS continues to make the case for the full inclusion sugar in the Australia-EU FTA.
✓ CANEGROWERS coordinated a Global Sugar Alliance meeting planning the next steps for engagement with the Indian industry and government in relation to the sugar dispute.
✓ Preparations are continuing for the industry’s forthcoming trade strategy meeting

National Sugarcane Industry RD&E Strategy
✓ CANEGROWERS attended a workshop with the National Sugarcane Industry RD&E Strategy - Working Group. The main topic discussed was a preliminary sugar industry research, development and extension capability audit which is being conducted by AgIsight. This is still work in progress.

Primary Industries Education Foundation Australia (PIEFA)
✓ CANEGROWERS had a hook up with PIEFA with discussion on:
✓ Plans for a teacher’s conference related to using agriculture in the schools curriculum in Queensland on 7 November 2019.
✓ Plans to continue a program called Facetime a Farmer whereby a farmer is connected directly to students in the classroom to explain an element of their business and answer questions.
✓ Plans to have a follow-up national survey of students to gauge their attitude to and understanding and awareness of agriculture.

Irrigation Project
✓ CANEGROWERS met with Irrigation Australia to discuss a proposed project to provide a short course with specific irrigation skill sets. Application for funding of the skill sets would be made through the Rural Jobs and Skills Alliance.

Market Update
⇒ While last week’s poor macroeconomic news from China was not well received in equity markets, it had little impact on sugar. Settling at US11.64c/lb on Friday, the prompt October-19 contract was down 22 points week-on-week.
⇒ As expected Australia, Brazil and Guatemala made their second request for the establishment of a WTO dispute panel last Thursday 15 August to investigate and rule on whether India’s subsidies breach global trade rules. The establishment of the panel sees the dispute move the next stage in the WTO dispute resolution process
⇒ Czarnikow says that based on initial beet tests and following a long hot dry summer, it expects this year’s EU sugar production to reach just 17.4 million tonnes. This would be the second year in which EU sugar production has fallen short of consumption, making the EU a net importer of sugar.
⇒ Gross prices currently available to Australian producers are:
⇒   Season 2019: A$393/t
⇒   Season 2020: A$427/t
⇒   Season 2021: A$442/t
⇒ For daily price updates and forward price indications, please contact your preferred marketer.

NB: This update contains basic general comments only and not financial advice. Marketing and pricing decisions should not be based on these comments. Readers should consider their own circumstances and take their own financial, legal and accounting advice as required.
Reminder: Important QSL pricing dates ahead

By Bryce Wenham, QSL Executive Manager Supplier Relations and Systems

September brings a number of important dates for QSL Growers with uncompleted 2019-Season grower-managed pricing, as well as those considering nominating tonnage to QSL’s 2020 Early-Start Actively Managed Pool and/or 2020 Self-Managed Harvest.

2019-SEASON PRODUCT DEADLINES

- **2019 QSL INDIVIDUAL FUTURES CONTRACT**: The Pricing Completion Date for the Individual Futures Contract’s October 2019 contract is 16 September 2019. Any tonnes remaining unpriced beyond this date will be priced by QSL at the next market opportunity.

- **2019 QSL SELF-MANAGED HARVEST**: The Pricing Completion Date for the Self-Managed Harvest’s October 2019 contract is 23 September 2019. Any tonnes remaining unpriced beyond this date will be priced by QSL at the next market opportunity.

- **2019 QSL TARGET PRICE CONTRACT**: Growers who have unpriced 2019-Season tonnes in the QSL Target Price Contract will have these automatically rolled forward after 20 September 2019 and costs may apply. These costs are not a charge imposed by QSL, but the cost of transferring unfilled pricing exposure from the Oct19 contract to the Mar20 contract and the difference in values between the two. Any costs from this Oct19-Mar20 roll will be in addition to the existing $1.22/tonne already incurred from the Jun19-Oct19 roll. You can find an estimate of the Oct19-Mar20 roll cost on the bottom of the Indicative ICE 11 Prices table published on the QSL website (www.qsl.com.au) and featured in our daily pricing email.

2020-SEASON PRODUCT DEADLINES

- **2020 QSL EARLY-START ACTIVELY MANAGED POOL**: Nominations for the 2020 QSL Early-Start Actively Managed Pool open on 1 September 2019 and close on 31 October 2019. This QSL-managed pricing option targets the best return for participants by pricing in an active manner designed to exploit short-term market opportunities. As its name suggests, it starts pricing earlier than the standard QSL Actively Managed Pool, giving the pool managers an additional six months in which to price this pool’s tonnage.

- **2020 QSL SELF-MANAGED HARVEST**: Nominations for the 2020 QSL Self-Managed Harvest open on 1 September 2019 and close on 31 October 2019. This grower-managed pricing option is designed to give growers the opportunity to manage their own production risk. To participate, growers must have a minimum of 300 tonnes and 35% of their GEI Sugar with QSL allocated to the QSL Harvest Pool. They are then responsible for pricing the entirety of their QSL Harvest Pool allocation against each of the four futures contracts available each season (July, October, March and May). Pricing restrictions remain in place for 20% of each participating grower’s nominated tonnage in the Self-Managed Harvest in order to maintain their production buffer.

For more information regarding any of the pricing products outlined above, please read the full Pricing Pool Terms available at www.qsl.com.au or from any QSL office.

DISCLAIMER: These articles contain information of a general or summary nature only and should not be relied on to make any pricing or pool selection decisions. This information does not constitute financial or investment advice, and growers should seek their own independent advice before making any such decisions, in addition to reading the full Pricing Pool Terms which are available on QSL’s website. Information about past performance should not be relied on as an indication of future performance, nor should anything in relation to these articles be taken to include representations as to future matters.

---

Annual General Meeting

The Board and Management of BPS cordially invite all Financial Members and Industry Representatives to join them at the AGM on Tuesday the 27th August 2019 at the Ayr Showgrounds Hall commencing 1.30pm. This year the guest speaker is Mr. Graham Brodie (Uni of Melbourne) who will present on “The Use of Microwave Technology to Control Weeds”

Other industry representatives also attending include QSL, SRA, NQ Dry Tropics, Incitec Pivot, Wilmar BioEthanol AgServices, along with all local Canegrower Collectives.

Afternoon Tea and Light Refreshments will follow.
Gross Pool Prices are an estimate based on the tonnes hedged and current market price (as at Manager has commenced pricing that portion of the pool that exceeds this downside risk to the pool.

For the 2019 Season Production Risk Pool we currently forecast that the quantity of sugar in the pool exceeds the downside risk to the crop (i.e. at 31 July 2019, the pool is greater than 30% of total estimated PPA sugar related to the Production Risk Pool). Accordingly the Pool Manager has commenced pricing that portion of the pool that exceeds this downside risk to the crop.

Gross Pool Prices are an estimate based on the tonnes hedged and current market price (as at the last business day of the month) for unhedged tonnage. Allocation Account Amounts begin the season as estimates and are reviewed and updated on a monthly basis as actual premiums and costs are known.

1. Wilmar has contributed economic interest sugar from its farms to this pool, to provide added premium. Wilmar economic interest sugar in this pool will receive the same price as growers.

2. For the 2019 Season Production Risk Pool we currently forecast that the quantity of sugar in the pool exceeds the downside risk to the crop (i.e. at 31 July 2019, the pool is greater than 30% of total estimated PPA sugar related to the Production Risk Pool). Accordingly the Pool Manager has commenced pricing that portion of the pool that exceeds this downside risk to the

The monthly pool price report is available on the Wilmar grower web.
1. If Reef regulations are passed by Parliament there will be a degree of disillusionment and disengagement across agriculture. At a time when we all need to be pulling in the same direction, this is something the Reef can ill afford. Read QFF’s QCL column HERE.

2. CANEGROWERS and their members have taken to television to tell the State Government its plan to ramp up regulation on their farms is not going to guarantee any benefit to the Great Barrier Reef. Catch the commercial on your television or watch the longer online video HERE.

3. The Rural Jobs and Skills Alliance (RJSA) celebrated National Science Week last week by answering your questions about the many and varied career opportunities in science, technology, engineering and mathematics (STEM) offered by the agriculture sector. Watch the video HERE.

4. The RJSA recently again met with the Queensland Agricultural Training Colleges (QATC) and the QATC Transition Project Management Office to continue the discussion about potential training delivery gaps in the regionally-based satellite hubs arising directly from the QATC closure. Find out more about the process HERE.

5. "It's going to have, and has had, a pretty lasting effect on rural communities." QFF Project Manager Ross Henry told AAP as Queenslanders are being told to brace for another hot and dry summer, with little respite expected for drought-hit farmers. Read the story HERE.

6. The Australian Taxation Office is continuing to provide assistance to those affected by the flooding in North Queensland. People having trouble with their tax or super affairs, can call the ATO on 1800 806 218 so they can help you find a solution. More information HERE.

7. The Queensland Government is developing an Energy-from-Waste Policy. A discussion paper to inform the policy is now available for feedback with stakeholder consultation workshops in Gladstone and Toowoomba later this month to introduce the discussion paper and identify concerns. Register HERE.

8. The inaugural National Renewables in Agriculture Conference and Expo will be held on 14 November in Wagga bringing together farmers, agribusiness and renewables experts including QFF’s Dr Georgina Davis, to share their expertise of on-farm renewables. Register HERE.

9. Join Nuffield Australia for their National Conference in Brisbane from 17-21 September. The event will showcase the 2018 Scholars’ ability to learn from farmers around the globe and sow the seeds of change that see individuals, businesses and wider industry flourish. Details HERE.

10. Unpredictable and intense weather conditions are impacting farming communities across Australia. AGL’s Farmers Assist program looks to give farmers greater control and certainty during these challenging times with two new assistance packages available. Details HERE.

Smartcane BMP self-assessment workshops
BMP self-assessment workshop will be held fortnightly on Monday mornings (9 –11 am).

The self-assessment is the first step towards BMP accreditation. Growers who have completed the self-assessment and would like to continue on to accreditation should also contact Terry or Jasmine.

Please RSVP to: Terry Granshaw - 0437 553 149  
Jasmine Connolly - 0438 934 601

The next workshop is scheduled for Monday 2nd September

IrrigWeb workshops
IrrigWeb workshops will be held fortnightly on Thursday mornings (9 - 11 am).

Workshops will cover: setting up a farm and paddocks; determining the irrigation point; and entering irrigation information.

You will need an internet capable laptop or tablet. Phones are suitable for recording irrigation events but their screens are too small for the initial setup. If you don’t have a laptop or tablet please let us know so we can organise one.

Please RSVP to Marian Davis - 0428 927 079.
canenews is read by the majority of Burdekin cane farmers and their families in the Burdekin. Copies are also circulated to all CANEGROWERS Offices, businesses, industry, politicians, Government Agencies and members of the community.
